

Muhebullah Karimzada, Ph.D.

Assistant Professor, School of Economics

University of Northern British Columbia, Prince George, British Columbia

muhebullah.karimzada@unbc.ca · Prince George, BC, Canada

Education

Doctor of Philosophy in Economics

November 2023

McMaster University, Hamilton, Ontario

Master of Arts in Economics

June 2009

University of Windsor, Windsor, Ontario

- M.A. Graduate Scholarship, 2008–2009

Honours Bachelor of Science

June 2007

University of Toronto, Toronto, Ontario

- Double Major: Economics and Integrative Biology

Academic Appointments

Assistant Professor

January 2025 – Present

School of Economics, Faculty of Business, University of Northern British Columbia

- Teaching-focused appointment in the Department of Economics, Prince George campus.
- Currently serving as member of the Curriculum Committee and Chair of the Student Recruitment Committee.

Sessional Lecturer

January 2018 – May 2025

Department of Economics, University of Waterloo, Waterloo, Ontario

- Taught introductory macroeconomics, monetary economics, and upper-level courses over multiple terms.

Sessional Lecturer

2023 – 2024

Department of Economics, University of Toronto, Toronto, Ontario

- Taught Topics in Macroeconomic Theory; classroom peer evaluation conducted by departmental faculty.

Sessional Lecturer*Winter 2017, 2018; Winter 2022; Summer 2023**Department of Economics, McMaster University, Hamilton, Ontario*

- Taught multiple macroeconomics courses across undergraduate levels; full instructor survey administered.

Teaching Experience**University of Northern British Columbia**

The following courses have been developed and taught independently. Enrolment figures are reported where documented.

As Assistant Professor (January 2025 – Present)

Term	Course	Title
Winter 2025	ECON 101	Principles of Macroeconomics
Winter 2025	ECON 220	Global Economic Shifts
Winter 2025	ECON 320	Intro. to Mathematical Economics
Fall 2025	ECON 101	Principles of Macroeconomics
Fall 2025	ECON 204	Contemporary Economic Issues
Fall 2025	ECON 308	International Economic Relations
Winter 2026	ECON 101	Principles of Macroeconomics
Winter 2026	ECON 204	Contemporary Economic Issues
Winter 2026	ECON 300	Labour Economics
Fall 2026	ECON 101	Principles of Macroeconomics
Fall 2026	ECON 308	International Economic Relations
Fall 2026	ECON 311	Intermediate Macroeconomics
Fall 2026	ECON 320	Intro. to Mathematical Economics
Winter 2027	ECON 101	Principles of Macroeconomics
Winter 2027	ECON 204	Contemporary Economic Issues
Winter 2027	ECON 230	Behavioural Economics
Winter 2027	ECON 300	Labour Economics

As Sessional Lecturer (Fall 2022, Fall 2023)

Independently taught introductory and upper-division economics courses including Principles of Macroeconomics, Contemporary Economic Issues, and Global Economic Shifts.

University of Waterloo

Sessional Lecturer, January 2018 – May 2025.

Introduction to Macroeconomics	Second-year undergraduate
Money and Banking I	Second-year undergraduate
International Finance	Upper-division undergraduate
Macroeconomics Theory III	Upper-division undergraduate

McMaster University*Sessional Lecturer, Winter 2017; Winter 2018; Winter 2022; Summer 2023.*

Introduction to Macroeconomics
 International Monetary Economics
 Intermediate Macroeconomics II

First-year undergraduate
 Upper-division undergraduate
 Third-year undergraduate

University of Toronto*Sessional Lecturer, 2023–2024.*

Topics in Macroeconomic Theory

Upper-division undergraduate

Teaching Expertise by Area

Macroeconomics	Principles of Macroeconomics; Intermediate Macroeconomics II; Macroeconomics Theory III; Topics in Macroeconomic Theory
Monetary & Financial	Money and Banking I; International Monetary Economics; International Finance
International Economics	International Economic Relations; International Finance; International Monetary Economics; Global Economic Shifts
Labour Economics	Labour Economics; topics: wage inequality, immigration, unemployment policy
Mathematical Economics	Introduction to Mathematical Economics; topics: optimization, comparative statics, differential equations
Behavioural Economics	Behavioural Economics (introductory and policy applications)
Contemporary Issues	Contemporary Economic Issues (inflation, inequality, housing, technology, climate)

Curriculum Development and Teaching Contributions

Course Development and Redesign

- Developed three complete online course packages — ECON 101, ECON 204, and ECON 220 — for initial asynchronous delivery at UNBC, including lecture slides, practice problem sets, tutorials, quizzes, and examinations (2024–25).
- Designed ECON 308 (International Economic Relations) and ECON 320 (Introduction to Mathematical Economics) as new course preparations for Winter 2025, each with full instructional and assessment materials.
- Substantially redesigned ECON 101 for in-person delivery in Fall 2025, introducing active-learning components, in-class discussion, and structured problem sessions alongside a revised assessment design.
- Redesigned ECON 308 comprehensively for Fall 2026 using Krugman, Obstfeld, and Melitz (12th edition), with original custom lecture slides featuring Canadian macroeconomic applications, TikZ-typeset diagrams, and a new pedagogical sequence integrating trade theory with open-economy macroeconomics.
- Developed ECON 300 (Labour Economics) for Winter 2026, using Benjamin et al. *Labour Market Economics* (9th edition) with original quizzes, assignments, and a progressive midterm structure.
- Prepared ECON 311 (Behavioural Economics) as a new offering for Fall 2026.

Instructional Materials in Progress

- *Contemporary Economic Issues: A Canadian Perspective* — original seven-chapter LaTeX textbook for ECON 204 / INTS 211, addressing a gap in Canadian-focused resources for this course; developed for use in Winter 2027.
- *Applied Econometrics* — thirteen-chapter course notes for ECON 621 (cross-listed senior undergraduate and graduate), covering causal inference, panel data, instrumental variables, difference-in-differences, matching, and regression discontinuity, with integrated R labs; developed for use in Winter 2027.

Technology and Pedagogical Innovation

- Delivered courses using Moodle and Achieve learning management systems for assessments, assignment submission, and student communication.
- Incorporated real Canadian macroeconomic data (Statistics Canada, Bank of Canada, IMF) into lectures and assignments to connect theory with current evidence.
- Developed custom Excel and Python-based simulations for topics including the money multiplier, output gap analysis, and exchange rate adjustments.
- Produced structured digital lecture materials for hybrid and online course delivery during the transition to remote teaching.

Student Mentorship

- Maintained an open-door advising policy, meeting regularly with students on academic performance, graduate school preparation, and career planning.
- Supported students applying to doctoral programs; former students have been admitted to highly competitive graduate economics programs in Canada and internationally.
- Adapted course materials and provided supplementary guidance to students with varied mathematics and writing backgrounds.

Academic Service and Leadership

Chair, Student Recruitment Committee

2025 – Present

School of Economics, UNBC

- Lead outreach initiatives promoting the economics program to prospective students, including coordination with local high schools.
- Design and update program recruitment materials; develop strategies to strengthen student engagement and enrolment.

Member, Curriculum Committee

2025 – Present

School of Economics, UNBC

- Review course offerings, update learning outcomes, and ensure alignment with program objectives.
- Contribute to discussions on new course proposals and undergraduate curriculum coherence.

Presenter

November 2025

ECON Development Forum, UNBC

- Participated in departmental forum on economic development and program planning.

Presenter

December 2025

School of Economics Seminar Series, UNBC

- Shared research and teaching practices with departmental colleagues.

Contributor

2024 – 2025

Student Recruitment and Orientation, UNBC

- Engaged with prospective students at campus events; contributed to orientation activities for incoming economics students.

Research Interests

Macroeconomics · Dynamic Stochastic General Equilibrium (DSGE) Modelling · Business Cycle Analysis · International Monetary Economics · Housing Market Economics · Labour Market Dynamics

My research uses structural macroeconomic modelling and applied microdata methods to examine business cycle fluctuations, housing investment, and labour market outcomes. Current projects employ Statistics Canada microdata accessed through the Research Data Centre (RDC) at UNBC. My research agenda complements my undergraduate teaching in macroeconomics, international economics, and labour economics.

Conference Presentations

59th Annual Conference of the Canadian Economics Association, Montreal, QC. May 2025

56th Annual Conference of the Canadian Economics Association, Ottawa, ON. June 2022

53rd Annual Conference of the Canadian Economics Association, Banff, AB. May 2019

9th RCEA Macro–Money–Finance Workshop "Monetary and Fiscal Policy in the Next Recession,"

University of Waterloo, Waterloo, ON.	<i>June 2017</i>
51st Annual Conference of the Canadian Economics Association, Halifax, NS.	<i>June 2017</i>
MidWest Macro Conference, University of Rochester, Rochester, NY.	<i>November 2015</i>
49th Annual Conference of the Canadian Economics Association, Toronto, ON.	<i>May 2015</i>

Awards and Fellowships

Ontario Graduate Fellowship, McMaster University.	<i>2015–2016</i>
M.A. Graduate Scholarship, University of Windsor.	<i>2008–2009</i>

Professional Development

“How Can We Effectively Use AI for Research,” workshop, Chalmers University of Technology (online).	<i>September 2025</i>
Research Data Centre (RDC) Orientation, Statistics Canada / UNBC.	<i>October 2025</i>
Faculty and Staff Orientation, UNBC.	<i>October 2025</i>
ECON Development Forum, UNBC.	<i>November 2025</i>
School of Economics Seminar Series, UNBC.	<i>December 2025</i>

Technical Skills

Econometrics / Statistics	STATA, R, MATLAB
Macroeconomic Modelling	DYNARE (DSGE estimation and simulation)
Programming	Python (data analysis and simulation)
Document Preparation	L ^A T _E X, Beamer, PGFPlots, TikZ
Learning Management	Moodle, Achieve
Data Sources	Statistics Canada (RDC microdata), Bank of Canada, IMF, World Bank
