

Category	Excellent	Good	Adequate	Marginal	Inadequate
An assignment which falls under one of the above categories should satisfy the description detailed in this row.	Strong evidence of original thinking; good organization; capacity to analyze and synthesize; superior grasp of subject matter with sound critical evaluations	Evidence of grasp of subject matter, some evidence of critical capacity and analytic ability; reasonable understanding of relevant issues	Understanding of the subject matter and ability to develop solutions to simple problems in the material	Some evidence of familiarity with the subject matter and some evidence that critical and analytical skills have been developed	Little evidence of even superficial understanding of subject matter; weakness in critical and analytic skills
Part 0: Introduction [5]	5 Concise introduction that grabs readers attention Does not include jargon, or irrelevant information. States relevant information in a concise manner.	4 Introduction grabs the readers' attention, however, includes some seemingly irrelevant information. Important information is explained in a mostly concise manner	3 Introduction grabs the readers' attention, but includes irrelevant information. Too long and overly verbose.	2 Introduction does not grab and the reader's attention. Introduction is slightly too long and includes seemingly irrelevant information	1-0 No proper introduction Introduction is too long and includes irrelevant/incorrect information for the assignment.
Part 1: Summary [10]	10-9 The Senior Deputy Governor Carolyn Rogers's speech is well explained in a concise manner. Summary demonstrates a thorough understanding of the concepts and is directly related to question posed.	8-7 The speech is mostly well-explained in a concise manner, however there are a few instances where the explanation is unclear. Summary demonstrates a considerable understanding of the concepts, however there are 1 or 2 instances where the summary.	6 The speech occasionally well-explained, however there are several facts/arguments that are not clearly explained. Summary demonstrates some understanding of the concept and there are numerous instances where the summary of concepts diverges from the question posed.	5 The speech is not well explained, with many facts and concepts remaining unclear. Summary demonstrates minimal to no understanding of the concepts, and provides a limited summary of the concepts that are relevant the question posed.	4-0 No summary of speech. Summary is a direct copy of the text/video of the speech.
Part 2: Question 1 [15]	15-14 The explanations are concise, plausible, and supported by the data and figures. Comparisons of data series demonstrates a thorough understanding of the differences each series. Correctly and precisely explains how to calculate all new constructed data series.	13-11 The explanations are plausible and supported by the available data for and figures. Comparisons of data series demonstrates a considerable understanding of each data series. Correctly explains how to calculate most new constructed data series.	10-9 The explanations are plausible and supported by the available data, however, some important aspects are not addressed or are unclear/incorrect. Comparisons of data series demonstrates a limited understanding of each data series. Explanations of how to calculate some new constructed series constructed are incorrect/unclear.	8 The explanations are not plausible not supported by the available data but attempt to address the question at hand. Comparisons of data series demonstrates a minimal understanding of each data series. Incorrectly explains how to calculate most, or all, new constructed series.	7-0 The explanations are not plausible, not supported by the available data, do not answer questions, are incorrect, or are unclear. Comparisons of data series demonstrates a minimal understanding of each data series. Does not explain how to calculate the constructed series.
Part 2: Question 2 [15]	15-14 The explanations are concise, plausible, and supported by the data and figures. Comparisons of data series demonstrates a thorough understanding of the differences each series. Correctly and precisely explains how to calculate all new constructed data series.	13-11 The explanations are plausible and supported by the available data for and figures. Comparisons of data series demonstrates a considerable understanding of each data series. Correctly explains how to calculate most new constructed data series.	10-9 The explanations are plausible and supported by the available data, however, some important aspects are not addressed or are unclear/incorrect. Comparisons of data series demonstrates a limited understanding of each data series. Explanations of how to calculate some new constructed series constructed are incorrect/unclear.	8 The explanations are not plausible not supported by the available data but attempt to address the question at hand. Comparisons of data series demonstrates a minimal understanding of each data series. Incorrectly explains how to calculate most, or all, new constructed series.	7-0 The explanations are not plausible, not supported by the available data, do not answer questions, are incorrect, or are unclear. Comparisons of data series demonstrates a minimal understanding of each data series. Does not explain how to calculate the constructed series.
Part 2: Question 3 [15]	15-14 Proposes a well-structured government intervention (e.g., subsidies) linked to economic and TFP goals Excellent use of evidence or examples to support ideas. Demonstrates independent thinking (little to no paraphrasing)	13-11 Proposes a government intervention linked to economic and TFP goals with few errors Some use of evidence or examples to support ideas Demonstrates some independent thinking but also makes use of paraphrasing	10-9 Proposes a government intervention linked to economic and TFP goals with several errors Some use of evidence or examples to support ideas presented Demonstrates little independent thinking and relies on paraphrasing and quotations to support ideas	8 Proposes a government intervention linked to economic and TFP goals with many errors or does not use it Evidence or examples are seldom used to support ideas presented, if at all. No independent thought and heavy dependence on quotations with some paraphrasing	7-0 No government intervention is proposed, Ideas and statements are not supported by evidence or examples No independent thought and heavy dependence on quotations with some paraphrasing
Structure, Style, and Flow [20]	20-18 Paragraphs are well organized by thought and flow logically Paragraphs transition smoothly between ideas Sentences are clear, easy to read and do not run on Writing is concise (each sentence has a purpose) The length is reasonable (700-1000 words) Economic concepts are explained in a manner that can be understood by non-experts Consistent and complete references	17-15 Most paragraphs are well organized by thought and flow logically Most paragraphs transition smoothly between ideas Most sentences are clear, easy to read and do not run on Most writing is concise (most sentences have a purpose) The length is reasonable (700-1000 words) Economic concepts are mostly explained in a manner that can be understood by non-experts Complete references but small inconsistencies	14-12 Paragraph organization and flow needs work Paragraphs do not always clearly connect ideas Reasoning and logic are sometimes unclear due to sentence structure and organization The length is acceptably shorter or longer than 700-1000 words Economic concepts are sometimes explained in a manner that can be understood by non-experts Complete references, but inconsistent format	11-10 Poor paragraph organization and flow Sentence structure and/or word choice and/or grammar makes it difficult to understand reasoning Too many lengthy quotations The length is acceptably shorter or longer than 700-1000 words Economic concepts are seldomly explained in a manner that can be understood by nonexperts Missing some references, inconsistent format	10-0 Significant sentence structure and/or word choice and/or grammar errors makes it difficult to understand reasoning Not completely written in words and paragraphs (bullet points, equations, graphs) The length is too short or too long Economic concepts are not explained in a manner that can be understood by non-experts No references provided (-15 points)
Data and Figures [20]	All data series are correctly calculated Every figure has a clear title to elicit which series are displayed. An clear and effective legend is included for figures with more than 1 data series. Units for all Figures are correctly and clearly labelled. All axes are correctly scaled	Most data series are correctly calculated (1-2 errors) Most figures have a clear title to elicit the series that are displayed. A legend is included for figures when more than 1 data series is present. Units for most figures are correctly and clearly labelled. 1-2 Axes on the figures could be rescaled to better elicit the series' trend.	There are some notable errors in the data series calculations Some figures have a title to describe which series are displayed. A legend is missing for in some figures with more than 1 data series. The included legends may be unclear. Units for some figures are correctly and clearly labelled. Axes are properly scaled on some figures, though the scale on most trends	Most data series are incorrectly calculated There are many notable errors in the data series calculations Figures do not include title and it is unclear which series are displayed. Legends are unclear or are omitted from figures with more than 1 data series. Numerous instances where labels are missing/unclear. Axes on figures are not properly scaled	All data sources are incorrect The calculations for the data series are incorrect. Figures are missing sufficient labeling to be discerned.
