

Finite Mathematics for Business and Economics**Monday, Wednesday and Friday 11:30-12:20pm 7-158****Instructor:** Erin Beveridge **Office:** 10-2060 **email:** erin.beveridge@unbc.ca **Phone:** (250)960-6263**Prerequisites:** 60% or better in MATH 115, Precalculus 12, or permission of Chair.**Syllabus:** This document is important and you are expected to be familiar with all parts of it. A complete list of learning objectives is attached and should be included if this document is submitted to another institution.**Text:** Available from the bookstore. *Finite Mathematics For the Managerial, Life, and Social Sciences* (Twelfth Edition) Soo T. Tan (2018).**Office Hours:** Most weeks I will be available on Monday and Thursday from 2:30-3:30. Monday hours will be in my office or MACE, and Thursday hours will generally be held at Super Supported Science Study sessions (4S). I will also be available by appointment and encourage all students to make use of this time.**Email:** Email should be reserved for those things that can not be asked in class or office hours. General questions should be asked in class. Please include [MATH150] in the subject line of any email that you send me. I will only respond to mail sent from your UNBC email address. I will attempt to respond the next business day.**Moodle:** Some of the course materials and activities will be available online at <http://moodle.unbc.ca>. You will require your UNBC UserID and password to access this site.**Course Goals:** This is a first year course mainly intended to introduce Commerce students to a range of mathematical ideas covering several topics that complement concepts or calculations used in economics or business fields. The emphasis is on mathematical foundation, more than on any replication of calculations that would be performed in a business course. Upon successful completion of the course students should have developed their mathematical reasoning skills to the point that they are able to:

- Read a math text and apply methods described.
- answer questions similar in nature to those presented in class,
- clearly identify the question and present a logical and legible answer, and
- face future courses and math concepts with confidence.

The secondary objective is for each student to leave the class with the ability to navigate university life successfully by becoming personally responsible for their individual education.

Course Outline: Time permitting the following topics will be covered:

- Review of basic algebra, graphing straight lines and inequalities.
- Solving systems of linear equations using matrices, matrix arithmetic and inverting a matrix.
- Linear programming both geometrically and using the simplex method.
- Logic, sets, counting, Venn diagrams, permutations, and combinations.
- Introductory probability, sample spaces, events, conditional probability, independence, odds.
- Interest.

This list of topics is subject to change. Some sections will be assigned as reading material. For a more detailed outline please see the attached list of learning objectives.

Dates: Friday September 15 – Final day for Math Readiness pre-quizzes
 Wednesday September 20 – Last day to drop course
 Friday September 22 – Math Readiness Review Packages due 4:00 pm
 Friday September 29 – Truth and Reconciliation Day closure(no class)
 Monday October 9 – Thanksgiving(no class)
 Friday October 13 – Term Exam 1 (tentative)
 Thursday October 26 – Last day to withdraw
 Monday November 6 – Term Exam 2 (tentative)
 Friday November 10 – Remembrance Day closure (no class)
 December 6 -16 – Exam period

Keep in mind these dates when planning your schedule. Any change to these dates will be announced both in class and online.

Mark distribution:	Math Readiness Programme	3%
	Class Work	27%
	Term Tests 1 & 2	40%
	Final Exam	30%

You must attend the final exam to pass the course.

I reserve the right to change the weight of any portion of this grading scheme should there be sufficient need. In particular if we are required to move to fully online instruction an amended syllabus will be provided within one week of the change.

Math Readiness: Our class will be taking part in a Math Readiness program. You must first register for a session to complete the 3 pre-quizzes looking at various mathematics skills from precalculus. If you do not receive 75% or better you will need to watch review videos and then complete a review quiz online. An information sheet for registration will be found in our class Moodle shell. You should also see a MATH 150 Readiness listed in your Moodle courses. If you do not see it the info page has a link. For any technical difficulties with this activity, or other questions please email mathreadiness@unbc.ca. You will receive 3% for completing this process. Under no circumstances will you be permitted to participate after the deadline. This process takes time to complete so do not leave it.

Course Work: The mark for course work will come from all graded activities other than math readiness, term and final exams. It will include, but is not limited to class quizzes and Mobius assignments. Some activities may be fully online although they will be announced in class.

Class Quizzes: There will be quizzes throughout the course. They will be announced during class usually the class before. They will normally be about 10 minutes in length.

Mobius: Each student needs to purchase access to the Mobius homework platform. Do not purchase this until directed to do so in class. There will generally be one such assignment released after every class and due the next class. These will vary in length and focus on material covered in the most recent lectures. There may be some longer assignments with longer completion times added as well. You must follow the access instructions that will be posted on Moodle. Failure to follow the instructions given will lead to a grade of 0 for the affected assignments.

Pre-recorded Lectures: For some lectures we may use a partial flipped classroom model. This means that some or all of the lecture that involves taking notes from the instructor is done through online recordings. Most recordings will have a video quiz to complete as you watch it. You may also be assigned other activities during the video.

Bonus Marks: On occasion I may assign bonus marks. These will almost never be announced in class. Bonus marks will be added to the course work grade but will not take that grade over 100%.

Suggested Exercises: Lists of suggested exercises will be posted online. It is highly recommended that you attempt all the exercises. Some exam questions will be based on these exercises.

Calculators: Only 'chequebook' calculators will be allowed for this course. That is a 6 button calculator that can do only the following functions; addition, subtraction, multiplication, division, percent, and square root. It may also have an extra 2 buttons for memory functions. You must have your calculator approved before use. Anyone found using a non-approved calculator will receive a mark of zero for that test or quiz.

Privacy: Graded items will be handed back individually at the start of class. If you miss a day where items were returned you must come to my office to receive it. Marks will be posted online. All such marks are unofficial. I encourage you to double check these marks and bring any errors or omissions to my attention.

Attendance: It is my expectation that you will attend the class regularly. If you must miss a class it is your responsibility to find out what you missed. You can do this by asking a friend or by coming to my office. If you have a valid reason for missing an exam or class quiz please let me know ahead of time where possible. I may allow you to write the exam or quiz on an alternate date. Examples of valid reasons to miss an exam include serious illness, death of an immediate family member, mandatory military service, jury duty, the birth of your child, bone marrow donation, or an irreconcilable conflict with another official UNBC activity. You must have written documentation signed by the appropriate person. If an emergency prevents you from sitting an exam please contact me within two days to make alternate arrangements. Failure to do so will result in a mark of zero being assigned for the missed exam. There will be no make up marks for other course work. Keep in mind the term dates when planning your schedule. Do not make travel plans until the final exam schedule is posted.

Supplemental Instruction: There will be a series of weekly review sessions led by a student SI leader. These optional sessions will provide you with an opportunity to go over problems at a slower pace and with more individualised help. It is also a chance to get together with other people in the class and learn from each other. I highly encourage you to find the time to attend these sessions regularly. A bonus mark may be available for regular SI participation.

Conduct: The rules of Student Conduct as outlined in the calendar apply to all students. In particular, academic offences are taken extremely seriously by the University and this department. Remember that you are here for your own benefit, and any form of cheating makes your effort meaningless. In particular copying your answers from another person or source. Even suspected cases of academic misconduct will be recorded and placed in your file at the Office of the Registrar.

Study Habits: Studies have shown that one of the prime indicators of success at university is time management. The best way to ensure success in this class is to carefully study all the material, do the example questions and all the suggested exercises. There is no substitute for this. If you find you are having difficulty it is best to be able to ask for help as early as possible. Please come and talk to me as soon as you find yourself in this situation. There are also resources available to help you through the Academic Success Centre. You are strongly encouraged to work with others. Form a study group to do practice problems together. Spend time in the MACE. Go to 4S.

Academic Accommodation: The Access Resource Centre (ARC) provides service to students with documented disabilities or health conditions, ranging from permanent to temporary, including but not limited to chronic health issues, hearing and visual impairments, learning disabilities and attention deficit/hyperactivity disorders, mental health and neurological disabilities, and mobility and other physical disabilities. ARC staff are available by appointment to assess specific needs, provide referrals, and arrange appropriate academic accommodations to assist students in achieving their academic goals. Students who may have a need for academic accommodation are encouraged to contact ARC by email at arc@unbc.ca, by phone at 250-960-5682 (toll free 1-888-960-5682), or in person at 5-157. For more information, please visit the Access Resource Centre website <https://unbc.ca/arc>.

Academic Success Centre: The Academic Success Centre provides students with FREE access to academic support services that include: tutoring (by appointment, asynchronous online, or drop-in); personalized study skills assessments; peer-led course supports; downloadable handouts; access to self-assessment sites; as well as customized programs and workshops.

You can also locate information about the Academic Success Centre and its services by logging into the Learning Commons on Blackboard and clicking on Academic Success Centre.

ASC services are available in-person at the Prince George Campus and online for distance, regional, or physically distanced students.

For more information see the Academic Success Centre website at www.unbc.ca/asc, to book an appointment visit the circulation desk on the first floor of the library, or phone 250-960-6367. Toll-free: 1-888-440-3440 (wait on the line and ask for the ASC).

Lecture Courtesy: Please show basic respect and courtesy to others during lecture. Cell phones, tablets and other devices that may make a noise are to be turned off during class. Discriminatory or disrespectful language and/or behavior of any sort are not welcome in our class. If you ever feel unsafe or unwelcome, please let me know and I will do my best to address the situation (either myself or by calling on outside supports). Idle conversation, eating, reading a book, text messaging, or using a laptop is distracting and discourteous. Anyone causing a distraction will be required to leave the class and will not gain any marks for any activities that day.

Communicable disease plan: In British Columbia the orders of the Provincial Health Officer are legally binding upon any person or class of persons mentioned in the order the moment the order is given by the officer. It is the duty of each person resident in British Columbia to stay informed and follow the current orders. At the time of printing I am hopeful that we will be able to complete our term with little or no adjustments required due to public health orders. However if the situation changes and we do have to change the course substantially then I will provide you with an amended syllabus.

Health and Wellness: The health and safety of our university community is of paramount importance. Please make yourself familiar with the information found at <https://www2.unbc.ca/safety/communicable-disease-plan>.

Please stay home if you are feeling unwell and letting me know by email. The UNBC Medical Clinic is a fully functioning clinic with established processes to support students with medical needs. If you need to talk with a Counsellor or are experiencing mental health issue/crisis, please contact the UNBC Counselling Centre, or other emergency options you can find listed on the UNBC website.

Copyright: Copyrighted items provided to you are normally licensed* through the library. Where not licensed, copies of materials (e.g. a PDF or WORD doc) in the course shell or distributed in class are made pursuant to the Fair Dealing Policy of the University of Northern British Columbia. Each copy may only be used for the purpose of research, private study, criticism, review, news reporting, education, satire, or parody. If the copy is used for the purpose of review, criticism, or news reporting the source and the name of the author must be mentioned. The use of each copy for any other purpose may require the permission of the copyright owner. Each copy should be deleted/discarded at the end of the course and/or research project.

*Licensed resources can be found electronically in library databases and are subject to the terms and conditions of the license (found on the database or journal record in the library catalogue).
