

UNIVERSITY OF NORTHERN BRITISH COLUMBIA
PROFESSIONAL ACTIVITY REPORT
JANUARY 1 TO DECEMBER 31

(NOTE: The Annual report shall include the previous calendar year. Please report activities for the period covered by this Report)

NAME: MUHEBULLAH KARIMZADA

PROGRAM/FACULTY: ECONOMICS/ FACULTY OF BUSIN

DATE: February 13, 2026

1. Summary statement of accomplishments.

Over the past year, I focused on strengthening my teaching, advancing my research agenda, and contributing to the service needs of the school. I prepared several new courses and updated existing ones to support both online and in-person delivery, developing complete course materials and incorporating applied examples and practice opportunities to support student learning.

My research activities included launching two housing-related projects: one using Statistics Canada RDC microdata to examine labour market dynamics in the construction sector, and another comparing Canadian and U.S. mortgage structures and their broader economic implications.

I also remained actively involved in service and outreach. I chaired the Student Recruitment Committee, worked with colleagues and the recruitment office to attract prospective students, and participated in outreach efforts aimed at promoting the value and relevance of studying Economics.

2. Record of Teaching activities and accomplishments including (but not limited) to the following:

a) Courses taught and number students in each course:

Course and Number	Course Credit	Type lecture, seminar, lab, tutorial, etc.	Number of Students	Hours per week	check one				check one	check one		check one	
					Fall	Winter	Spring	Summer	Prince George	Other Location	Part of load	Overload	Distance Delivery
ECON 101	3.0	Lecture	63	3.0		X					X		
ECON 204	3.0	Lecture	26	3.0		X					X		
ECON 220	3.0	Lecture	19	3.0		X					X		
ECON 101	3.0	Lecture	34	3.0	X				X		X		X
ECON 308	3.0	Lecture	6	3.0	X				X		X		X
ECON 320	3.0	Lecture	4	3.0	X				X		X		X

- b) Graduate students supervised and in progress:
 * Principal (p); Co-Principal (c); Member (m)

Name of the student for whom you are the supervisor	Title of thesis or project	Thesis(T) or Project(P)	check one			check one			
			PhD	Masters		*Principal	Full-Time	Part-time	Inactive

- c) Number of undergraduate students formally advised: _____

- d) Participation in teaching workshops, seminars or training sessions:

Name	Date	Where
Canadian Economic Association Conference	May 29 - June 01, 2025	Montreal
How can we effectively use AI for research	September 25, 2025	Online - Chalmers University of Technology in Gothenburg, Sweden.
Faculty and Staff Orientation	October 01, 2025	UNBC
RDC Orientation	October 29, 2025	UNBC
ECON Development Forum	November 27, 2025	UNBC
School of Economics Seminar Series	December 05, 2025	UNBC

- e) Description of new course preparation and course revision including innovative approaches to teaching:

During the review period, I completed three new course preparations: ECON 101, ECON 204, and ECON 220, all delivered online. I designed complete course packages, including lecture notes, presentation slides, practice problem sets, tutorials, and assessments (quizzes and exams), ensuring clarity, accessibility, and student engagement in a virtual learning environment.

In September 2025, I developed two additional new preparations, ECON 308 and ECON 320, while substantially redesigning ECON 101 for its first in-person delivery. This transition involved major pedagogical adjustments to enhance classroom interaction, applied learning, and student participation. Across all courses, I created comprehensive instructional and assessment materials to support learning outcomes and maintain academic rigor.

- f) Any other information the Member considers relevant:

I contributed to departmental recruitment efforts by engaging with prospective students and promoting the value of studying Economics. I presented at Discovery Day to high school students, highlighting academic pathways and career opportunities in Economics. I also collaborated with colleagues and staff on initiatives designed to enhance program visibility and student engagement.

3. Record of academic and scholarly activities and accomplishments including (but not limited to):
(Please attach evidence of works)

- a) Books published or accepted for publication (peer reviewed):
- b) Articles published or accepted for publication (peer reviewed):
- c) Reports, monographs and other publications:
- d) Conference papers and posters presented:
- e) Books and articles published or accepted for publication (non-peer reviewed):
- f) Book reviews, manuscript reviews, external reviews:

- g) Performances or other scholarly activities:

During the reporting period, I met with colleagues Terry Yip (University of Toronto) and Shahed Khan (Western University) to discuss new research directions. These discussions led to the development of two new research projects: one involving the use of Statistics Canada microdata through the Research Data Centre (RDC), and another based on publicly available datasets. Both projects focus on the Canadian housing market.

- h) Research and/or other scholarly work in progress:

During the reporting period, I prepared and submitted a research proposal to obtain access to Statistics Canada microdata through the Research Data Centre (RDC). Access was granted by the end of September, and I subsequently began work on the project titled *“Labour Market Dynamics of Construction Workers in the Canadian Housing Cycle: A Microdata Analysis.”*

- i) Scholarly journals edited:

- j) Grants, contracts, or other awards requested, received, pending or rejected. State for research awards whether principal or co-investigator:

Granting Body	Title	Amount Awarded or Requested	Principal Investigator (PI) or Co- Investigator (CI)	Date Awarded or Rejected	Status			
					Requeste	Received	Pending	Rejected

Comments (if any) on rejected projects.

- k) Graduate work or continuing education in progress:

4. Record of service to UNBC, the profession, and the general public:

- a) Awards and honours received:

- b) Committee and other service within the university:

I served as a member of the Curriculum Committee and as Chair of the Students Recruitment Committee. As part of the Curriculum Committee, I contributed to discussions on course offerings, program requirements, and curriculum development to ensure alignment with learning outcomes and program goals. As Chair of the Student Recruitment Committee, I worked with Dr. Karima Fredj and colleagues to coordinate and plan events and high school engagement activities. I also collaborated closely with the University's recruitment office to attract prospective high school students and enhance the visibility of our programs.

- c) Discipline-related service to the community or region:

- d) Continuing education activities:

e) Other Services:

I attended the monthly FBE Council meetings as well as Economics Program meetings.

5. Description of the nature and scope of all non-trivial outside professional activity:

6. Statement of:

a) Teaching objectives for the coming year:

Over the coming academic year, I plan to continue improving my courses to make them more engaging, accessible, and relevant for students. I intend to update lecture materials and assessments, so they align more closely with learning objectives, while incorporating additional Canadian and real-world examples to help students see how economic concepts apply beyond the classroom.

I would also like to expand the use of in-class problem solving and discussion to strengthen students' analytical skills and confidence in working with economic ideas. In my upper-level courses, I plan to include more data-based and policy-relevant applications, particularly related to housing markets and macroeconomic dynamics, to deepen students' practical understanding of the subject.

More broadly, I aim to continue using active learning approaches and supportive resources that address different learning styles, while providing clear guidance and timely feedback. I will also continue to reflect on student feedback and classroom experience to refine my teaching and improve the overall learning environment.

b) Research or scholarly objectives for the coming year:

In the coming academic year, I plan to advance two research projects initiated during the reporting period, both focused on housing market dynamics.

The first project uses Statistics Canada microdata accessed through the Research Data Centre (RDC) to examine labour market dynamics among construction workers over the housing cycle. The study aims to better understand employment stability, earnings patterns, and worker mobility during periods of housing expansion and contraction. The findings are intended to inform policy discussions related to housing supply constraints, labour shortages, and workforce adjustment in the construction sector.

The second project examines differences between Canadian and U.S. mortgage structures and their implications for household financial stability and macroeconomic dynamics. Using aggregate data from Canada and the United States, this paper compares features such as mortgage terms, renewal risk, interest rate sensitivity, and borrower exposure to payment shocks. The project seeks to understand how institutional differences between the two systems influence household vulnerability, housing market stability, and the transmission of monetary policy.

Over the coming academic year, I plan to continue data analysis and model development, present preliminary findings at conferences and seminars.

- c) Service objectives for the coming year:

In the coming academic year, I plan to continue contributing to the service needs of the School of Economics and University. I will remain actively engaged in curriculum discussions and program development to support the quality and coherence of our academic offerings.

As part of my ongoing recruitment efforts, I aim to strengthen outreach to high school students and prospective applicants by working closely with the University's recruitment office, participating in outreach events, and promoting the value of studying Economics. I also plan to support initiatives that enhance program visibility and student engagement. I will be visiting PGSS Secondary School on March 6, 2026, to speak with students about the Economics program at UNBC, how economics applies to real-world issues, and why it is relevant to everyday decision-making.

- 7. Description and evidence of engaged teaching, which may include a description of one's teaching philosophy, changes to course delivery/assignments to improve student learning, peer-reviews, and course surveys initiated by the Member.**
- 8. Please attach any information describing any extenuating circumstances that you would like to include.**
