

Teaching Dossier

Professor: Dr. Muhebullah Karimzada

Teaching Philosophy:

As an economics instructor, I am dedicated to helping students understand the economic principles and theories that shape our world. Over the last eight years, I have had the opportunity to teach a wide range of economic courses, including Introduction to Macroeconomics, Intermediate Macroeconomics, Contemporary Economic Issues, Mathematical Economics, Labor Economics, Global Economic Shifts, International Economic Relations, International Finance, International Monetary Economics, and Money and Banking. Each of these courses provides a unique perspective on macroeconomics, and I am passionate about helping students develop a comprehensive understanding of the field.

My approach to teaching economics is centered on the belief that students learn best when they are actively engaged in the learning process. I strive to create a dynamic and interactive learning environment that encourages students to think critically and independently about the material. To achieve this, I use a variety of teaching methods, including interactive lectures, case studies, group projects, and online resources. I believe that students learn best when they can see the material in action and apply the concepts they are learning to real-world situations.

To make economics interesting and relevant to all students, I take great care to explain complex concepts in a clear and concise manner, using a variety of real-world examples to illustrate the material. I also incorporate current events and real-world data into my lessons, as this helps to bring the material to life and make it more relevant to students' experiences.

One of my main teaching philosophies is that economics is a subject that should be taught in a way that fosters critical thinking skills. I believe that the goal of education is not simply to impart knowledge, but to encourage students to think for themselves and develop their own opinions and ideas. To this end, I encourage students to ask questions, consider alternative perspectives, and challenge conventional wisdom. I believe that this type of engagement helps students to see the subject matter in a broader context and to develop their own ideas and opinions.

In addition to fostering critical thinking skills, I am also committed to creating an inclusive and supportive learning environment. I recognize that students come from a wide range of backgrounds and have varying levels of experience with economics, and I try to create an atmosphere that is welcoming and inclusive for all. I also take an active role in providing individual support to students who may be struggling with the material, and I offer extra help sessions and one-on-one meetings as needed. My goal is to inspire curiosity, instill a passion for learning, and prepare students for success in their academic and professional endeavors. During my teaching career, I have supported many students in their graduate school application processes. Some of my students have been accepted to prestigious institutions, including the University of Toronto, Stanford, MIT, Oxford, and more. I have attached an email message from one of my students who got admission to all these schools.

In my courses on Global Economic Shifts, Contemporary Economic Issues, International Economic Relations, and International Monetary Economics, I place a special emphasis on the interconnectedness of economies and the global economic forces that shape our world. I believe that it is essential for students to understand the economic and financial relationships between countries, and to have a basic understanding of the international monetary system and exchange rate mechanisms. Through these courses, I aim to provide students with a broad understanding of the global economy and the role that macroeconomic policies play in shaping international trade and finance.

Finally, in my courses on Money and Banking, I explore the role that money and the financial system play in the economy. I believe that it is essential for students to understand the basic mechanics of money and the financial system, and to appreciate the impact that monetary policy can have on the economy. In these courses, I use a variety of real-world examples and case studies to demonstrate the importance of monetary policy and the role that central bank, and financial institutions play in the economy. For example, I use the COVID-19 crisis, to analyze the impact of monetary policy during the COVID-19 period and post-COVID-19 period on the Canadian economy.

Overall, I believe that economics is a subject that is both fascinating and relevant to our lives, and I am committed to helping students develop a comprehensive understanding of the subject.

As part of my service to the School of Economics at the University of Northern British Columbia (UNBC), I have been an active member of the Curriculum Committee and currently serve as Chair of the Student Recruitment Committee. In the Curriculum Committee, I work collaboratively with colleagues to review course offerings, update learning outcomes, ensure alignment with program objectives, and strengthen the coherence and quality of the undergraduate curriculum. As Chair of the Student Recruitment Committee, I lead initiatives to promote the economics program, coordinate outreach events with local high schools, design recruitment materials, and develop strategies to enhance student engagement and enrollment. These roles have allowed me to contribute meaningfully to both the academic development of our programs and the broader visibility of the department.

4. Review of course documents by Dr. Laurent Cavenaile (University of Toronto)
5. Full Survey Instructor Report from teaching Introductory Macroeconomics at McMaster University.
6. Official Student Course Perception Results from teaching Money and Banking I at the University of Waterloo.

Re: Request for Letter of Recommendation - Yonglai Zhu

Yonglai Zhu <y429zhu@uwaterloo.ca>

Tue 2023-06-13 12:49 PM

To: Muhebullah Karimzada <m4karimzada@uwaterloo.ca>

Dear Professor Karimzada,

I am writing to provide you with an update on the results of my master's applications.

First, thank you for serving as my recommender for my master's applications! I have received admissions from several esteemed institutions:

Carnegie Mellon	Computational Finance (MSCF)
Stanford	Management Science & Engineering, Financial Analytics Track
MIT	Master of Finance (Mfin)
UToronto	Master of Financial Economics (MFE)
UCBerkeley	Financial Engineering (MFE)
Oxford	MSc in Mathematical and Computational Finance (MCF)

I will be attending Stanford University this upcoming fall. Once again, I extend my heartfelt appreciation to you. Your encouragement and genuine recommendation played an integral part in securing these exceptional offers. I am truly grateful for your support. 😊

On another note, I would be at the Waterloo Campus on June 13,14,15. I was wondering if you will also be available at the Waterloo campus during these dates. **If so, I would appreciate it if you could provide me with a time when I can meet you in your office.** It would be wonderful if we could meet in person!

Thank you again!

Kind regards,
Yonglai

Description of Your Report

Your Course Evaluation Report contains up to four sets of items, represented in up to four sections in your report, described below.

Sets of Items

Institutional Items

These eight items are consistent across the University of Toronto. They are comprised of:

- Five rating-scale items which represent institution-wide teaching and learning priorities.
 - **The institutional composite mean, a mathematical average of these first five items.**
- One rating-scale item on the overall quality of a student's learning experience.
- Two qualitative comment items.

Divisional Items

These items are consistent across your division. They represent division-wide priorities for teaching and learning.

Departmental/Program/Course-Type Items

These items (when applicable) represent further levels of granularity and specificity for teaching and learning priorities within your division (e.g., department, program, course type).

Instructor-Selected Items

These items are optional items which may be selected from the item bank by instructors during the question personalization period.

- **Note that the results from these items are only reported to instructors, as they are primarily intended to function as personal formative feedback.**

Report Sections

The following provide different statistical summaries and representations for your institutional, divisional, and departmental/programmatic items (where appropriate).

Section 1: Course Evaluation Overview

Provides all course evaluation data except instructor-selected items.

Section 2: Response Distributions and Additional Statistics

Provides detailed response distributions.

- The number and relative percentage of respondents providing a given answer is provided, along with a graphical representation.
- This section also reports further statistics for each set of items relative to Section 1.

Section 3: Comparative Data

Provides comparative means for your course as compared to the relevant means across *all other evaluated courses at a particular level of comparison (e.g. division, program)* for each set of items.

Section 4: Instructor-Selected Items

Provides data for optional items that instructors can select from the item bank during the question personalization period. This section is formatted identically to Section 2.

Statistical Terms Used in this Report

Mean: The mathematical average. This measure is the most sensitive, and can be greatly affected by extreme and/or divergent scores.

Median: The middle value when all responses are ordered. This measure is less affected by extreme and/or divergent scores.

Mode: The most frequently occurring score.

Standard deviation: A measure of the "spread" of the data.

Course Name: Topics in Macroeconomic Theory MGEC06H3-F-LEC01

Section 1: Course Evaluation Overview

Part A. Core Institutional Items

Scale: 1 - Not At All 2 - Somewhat 3 - Moderately 4 - Mostly 5 - A Great Deal

Question	Summary	
	Mean	Median
I found the course intellectually stimulating.	4.3	4.0
The course provided me with a deeper understanding of the subject matter.	4.3	5.0
The instructor (Muhebullah Karimzada) created an atmosphere that was conducive to my learning.	4.2	4.0
Course projects, assignments, tests, and/or exams improved my understanding of the course material.	4.1	4.0
Course projects, assignments, tests and/or exams provided opportunity for me to demonstrate an understanding of the course material.	4.0	4.0
Institutional Composite Mean	4.2	-

Scale: 1 - Poor 2 - Fair 3 - Good 4 - Very Good 5 - Excellent

Question	Summary	
	Mean	Median
6. Overall, the quality of my learning experience in this course was....	3.8	4.0

7. Please comment on the overall quality of the instruction in this course.

Comments
The professor was great during the lectures. He made sure that everyone was caught up and always got feedback from the students about his pacing and was always answering questions.
The professor was patient and personally encouraged an atmosphere that focused more on learning and understanding itself, which is precious to me.
Overall quality has been great. The professor is friendly, approachable, and nice. He is very good at explaining concepts. The only thing is this course is very theoretical and it involved no math at all. Understanding deep theory is challenging. The course is not practical at all. However, the professor is good at teaching it.
The learning atmosphere here is very good, and the professor is very nice and patient to answer the questions I have. Overall, I did learned a lot and find it a nice course.
Lazy lecturers
I have a better understanding on macroeconomic theories after taking EB06, and I'm willing to look further into D-level courses after taking this course. I'm really comfortable with how the course is paced and I can catch up most parts of it. Though I do hope that the problem sets can be more representing to what we will be facing for term tests. I found the slides and notes mostly useful when studying.
I think it's very good because it made me learn a lot
good
Overall it is good but it is difficult for me to get a high mark.
very good
He's a great professor, I can feel his love for teaching and he's more focused on whether or not you're actually learning. He will give you the chance to redo the exam afterward and get a bonus mark, I don't think his classes are very stressful and I enjoy it !
It was amazing, just have to study real hard for exams
In class instruction is clear and comprehensible but solutions to problem sets should be posted earlier than day before midterm so that students can make queries.
good, but I wish there're more topics cover in class
very good
Nice
Pretty bad at explaining concepts or connecting materials together. Always make mistakes during lectures. Condescending as well as rude to all the students. Does not prepare his own slides but use text book's examples. Do not understand the key concepts neither. When making mistakes, never commit to the mistakes but blame the text book for being too outdated. Always try to show that UTSC is worse than McMaster by intentionally comparing both universities.
really great, learned a lot through this course..
instructions are clear
Good

8. Please comment on any assistance that was available to support your learning in this course.

Comments
the problem sets
Professor was responsive to the emails.
I can gain help from the office hours of Professor and TA. I usually use this time to solve my problems remaining during class time.
The notes and problem sets posted on quercus really helps a lot.
I think this professor is excellent, and he understands his students. At the same time, he answered questions very patiently. Replying to emails is also very fast.
good
The sample tests are really helpful.
put more questions in test which Appeared in the problem set and homework.
N/A
Professor was always happy to explain questions in class, prompt when replying to emails and overall very considerate and provided good support throughout the semester. Office hours with him also helped.
very good
Very good.
Not too much, only slides that are available along with the textbook and several problem sets.
practice questions are helpful
Good

Part B. Divisional Items - UTSC

Scale: 1 - Not At All 2 - Somewhat 3 - Moderately 4 - Mostly 5 - A Great Deal

Question	Summary	
	Mean	Median
9. The course inspired me to think further about the subject matter outside of class.	4.0	4.0

Scale: 1 - Very Light 2 - Light 3 - Average 4 - Heavy 5 - Very Heavy

Question	Summary	
	Mean	Median
10. Compared to other courses, the workload for this course was:	3.2	3.0

Scale: 1 - Not At All 2 - Somewhat 3 - Moderately 4 - Mostly 5 - Strongly

Question	Summary	
	Mean	Median
11. I would recommend this course to other students.	3.6	4.0

Part C. Departmental Items - Management

Scale: 1 - Not At All 2 - Somewhat 3 - Moderately 4 - Mostly 5 - A Great Deal

Question	Summary	
	Mean	Median
12. The course instructor (Muhebullah Karimzada) was enthusiastic about the course material.	4.3	5.0
13. The course instructor (Muhebullah Karimzada) explained concepts clearly.	4.2	5.0
14. The course instructor (Muhebullah Karimzada) expressed an interest in student understanding when explaining course concepts.	4.3	5.0

Section 2: Response Distributions and Additional Statistics

This section provides detailed response distributions.

Mean: The mathematical average. This measure is the most sensitive, and can be greatly affected by extreme and/or divergent scores.

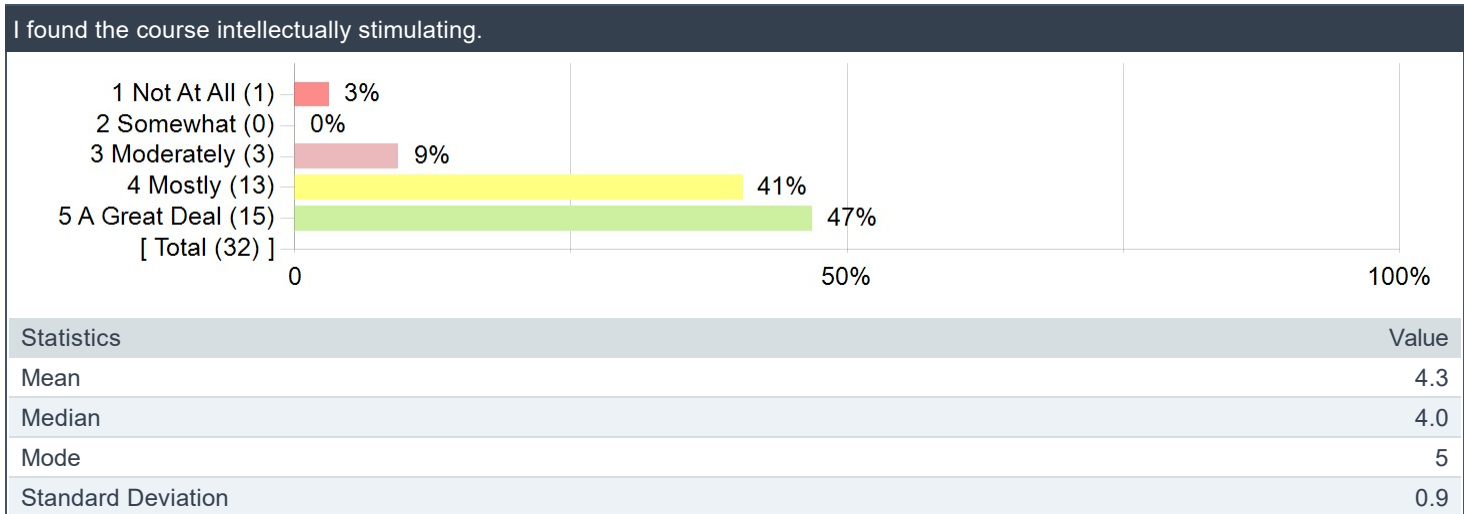

Median: The middle value when all responses are ordered. This measure is less affected by extreme and/or divergent scores.

Mode: The most frequently occurring score.

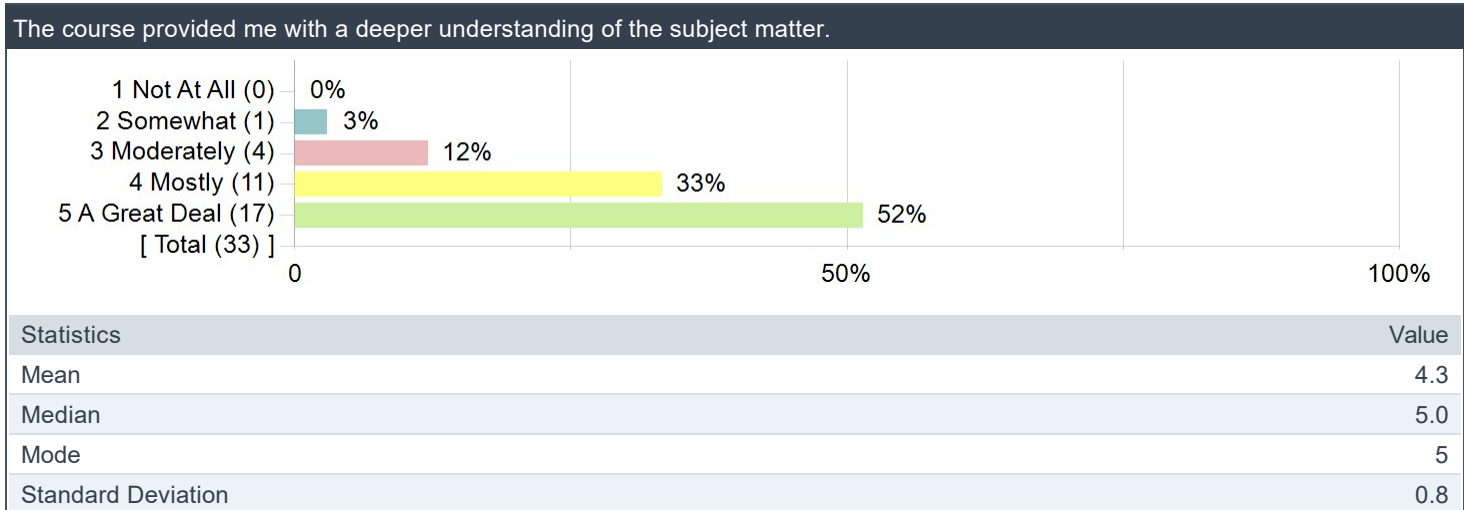

Standard deviation: A measure of the "spread" of the data.

Part A: Core Institutional Items

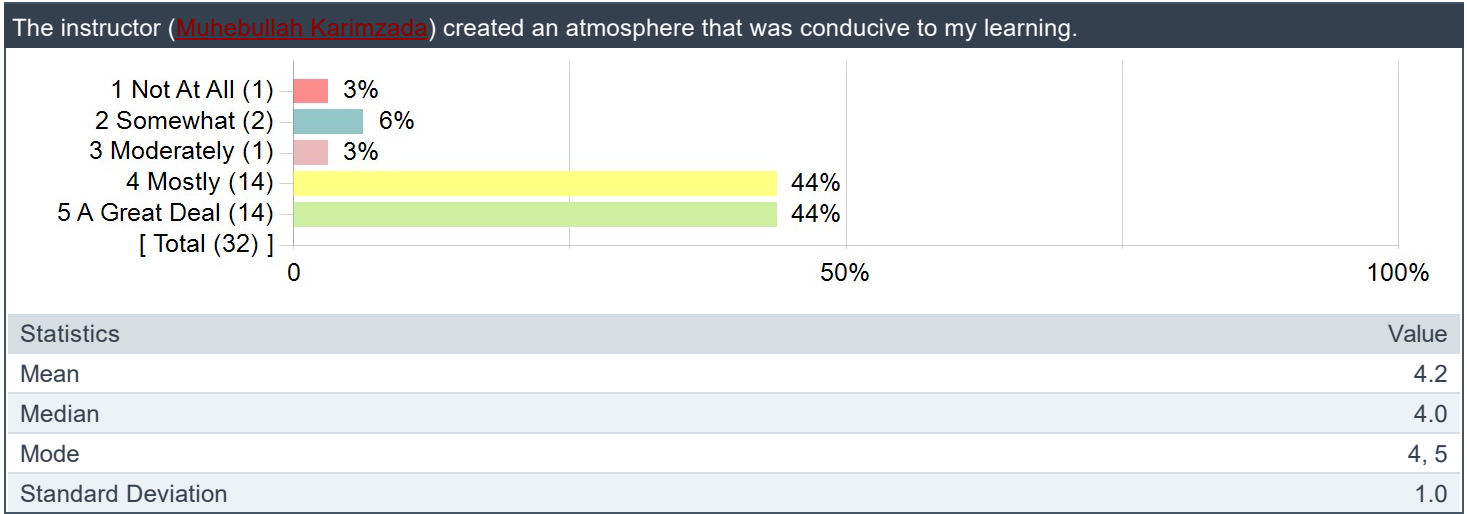

1. I found the course intellectually stimulating.

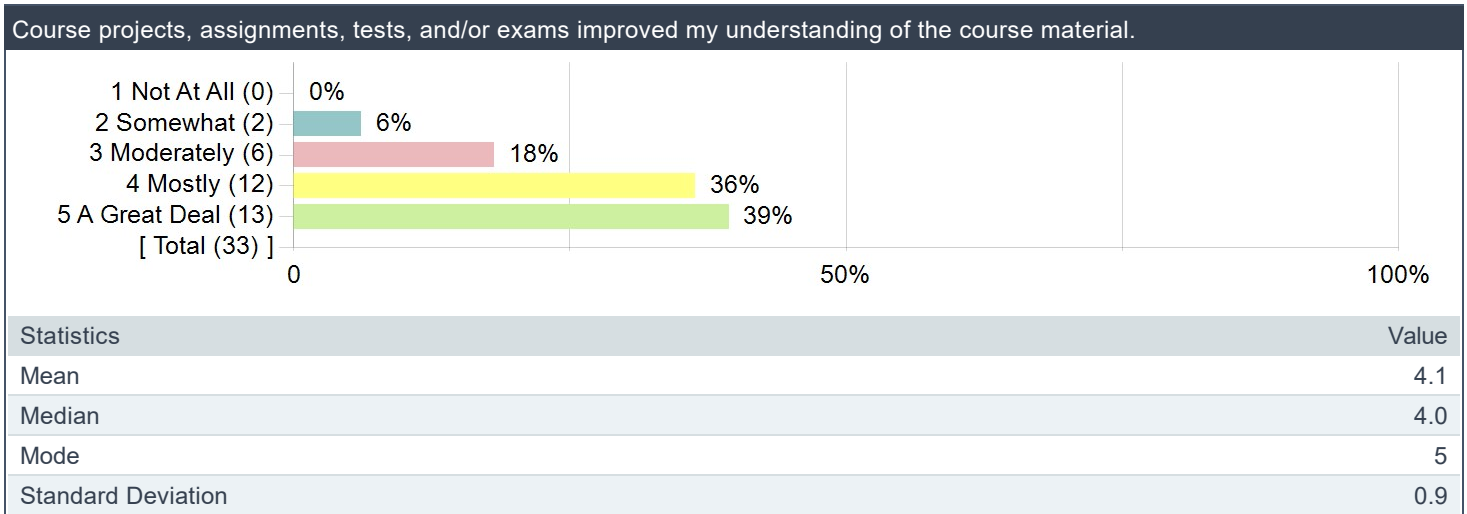

2. The course provided me with a deeper understanding of the subject matter.

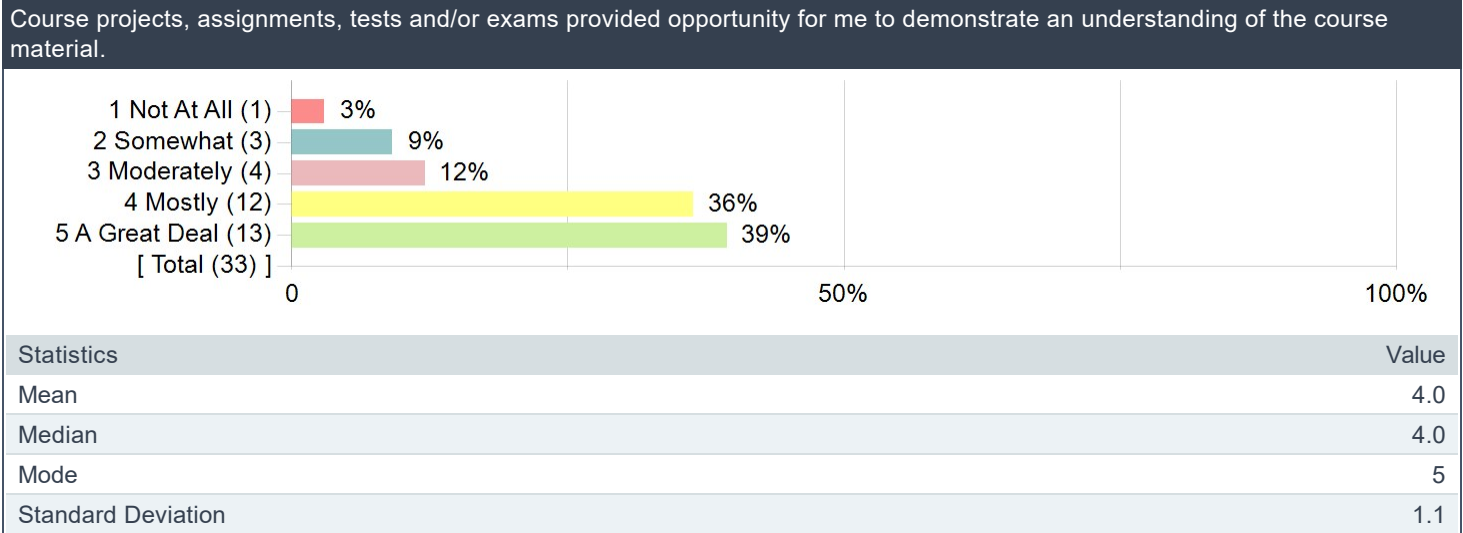

3. The instructor (**Muhebullah Karimzada**) created a course atmosphere that was conducive to my learning.

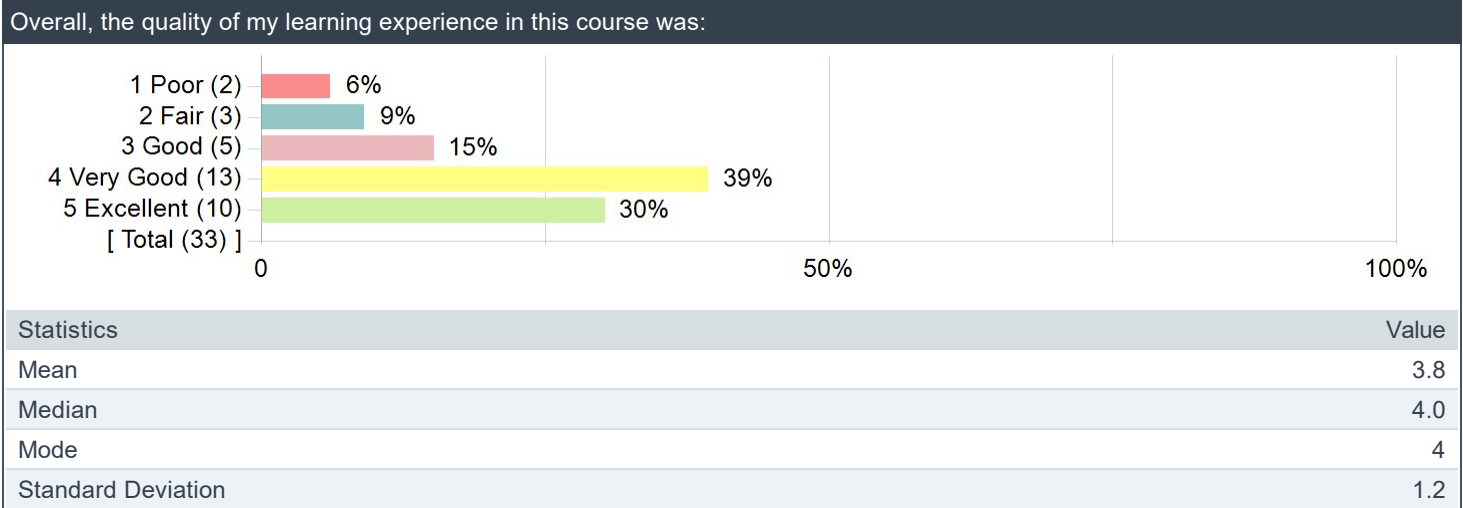

4. Course projects, assignments, tests and/or exams improved my understanding of the course material.

5. Course projects, assignments, tests and/or exams provided opportunity for me to demonstrate an understanding of the course material.

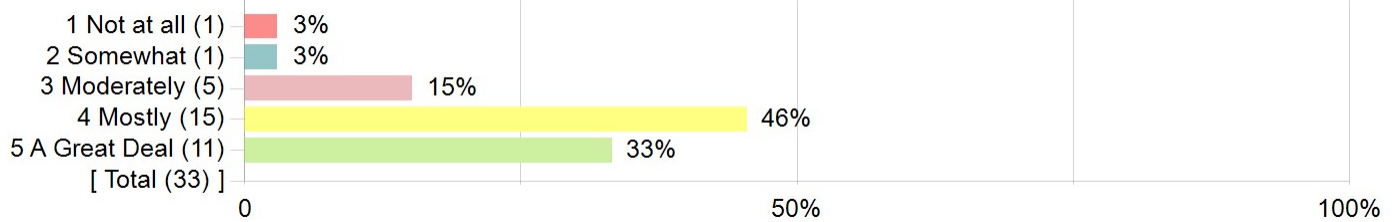

6. Overall, the quality of my learning experience in this course was....

Part B. Divisional Items - UTSC

9. The course inspired me to think further about the subject matter outside of class.

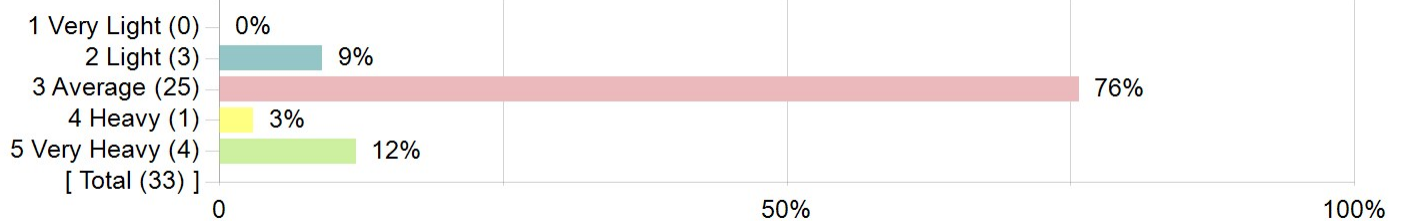

UTSC001 The course inspired me to think further about the subject matter outside of class.

Statistics	Value
Mean	4.0
Median	4.0
Mode	4
Standard Deviation	1.0

10. Compared to other courses, the workload for this course was:

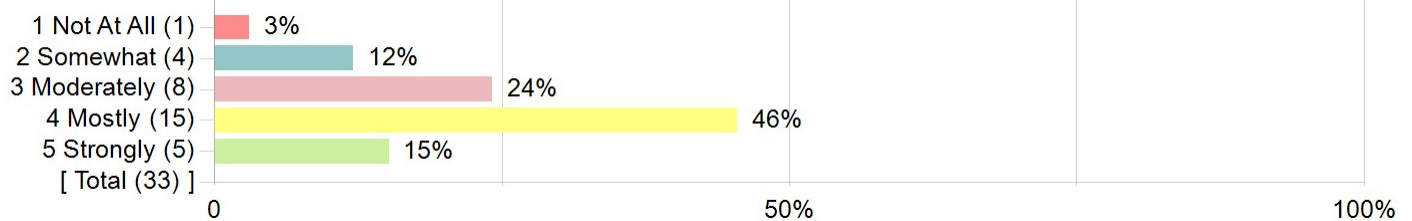

UTSC002 Compared to other courses, the workload for this course was:

Statistics	Value
Mean	3.2
Median	3.0
Mode	3
Standard Deviation	0.8

11. I would recommend this course to other students.

UTSC003 I would recommend this course to other students.

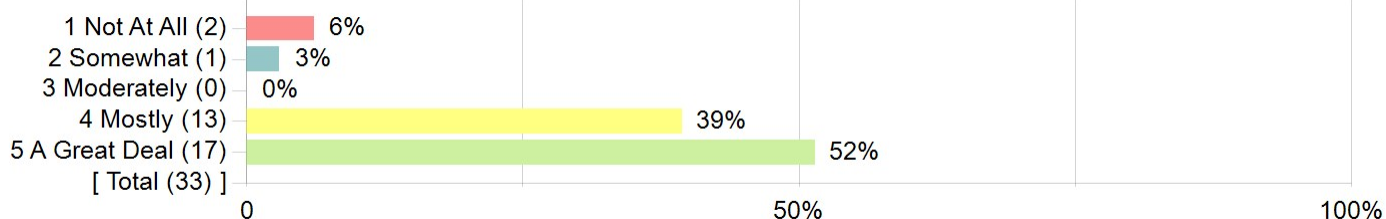

Statistics	Value
Mean	3.6
Median	4.0
Mode	4
Standard Deviation	1.0

Part C. Departmental Items - Management

12. The course instructor (**Muhebullah Karimzada**) was enthusiastic about the course material.

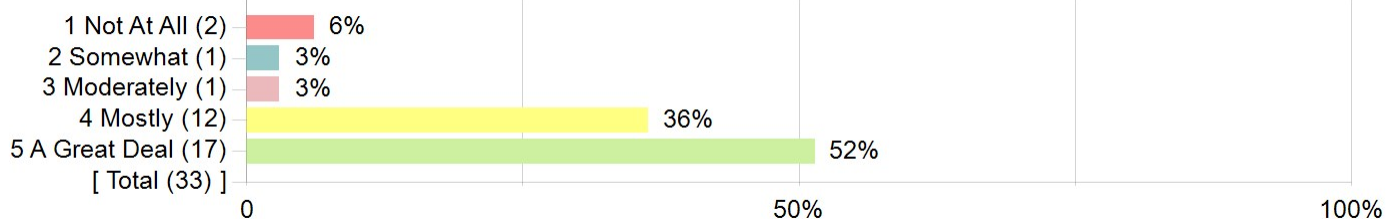

UTSCMGMT001 The course instructor (**Muhebullah Karimzada**) was enthusiastic about the course material.

Statistics	Value
Mean	4.3
Median	5.0
Mode	5
Standard Deviation	1.1

13. The course instructor (**Muhebullah Karimzada**) explained concepts clearly.

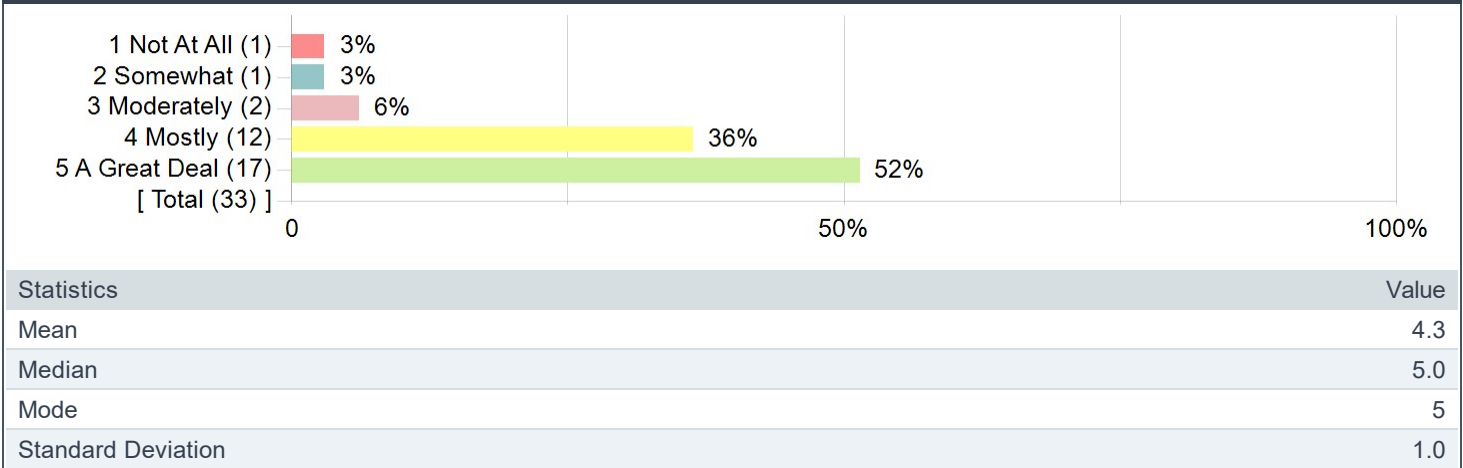

UTSCMGMT002 The course instructor (**Muhebullah Karimzada**) explained concepts clearly.

Statistics	Value
Mean	4.2
Median	5.0
Mode	5
Standard Deviation	1.1

14. The course instructor (**Muhebullah Karimzada**) expressed an interest in student understanding when explaining course concepts.

UTSCMGMT003 The course instructor (**Muhebullah Karimzada**) expressed an interest in student understanding when explaining course concepts.

Section 3. Comparative Data

This section provides overall means for given comparators (e.g., division, department) alongside the mean values for a given course. Note that the comparators are calculated by pooling together all individual student survey responses (e.g., student responses for all of the courses in a department are pooled together and the departmental mean responses calculated from that). The provided comparators are thus a measure of the 'average' student experience for a unit or division; they are not a measure of the 'average' course in a unit or division. This calculation has the effect of giving large courses more 'weight' in the calculation of the comparator means. The effect of this on the calculated comparator varies depending on the relative proportion of large or small courses within a unit or division. As such, the departmental and divisional comparative mean values provided on course evaluations should not be regarded as an absolute and definitive benchmark.

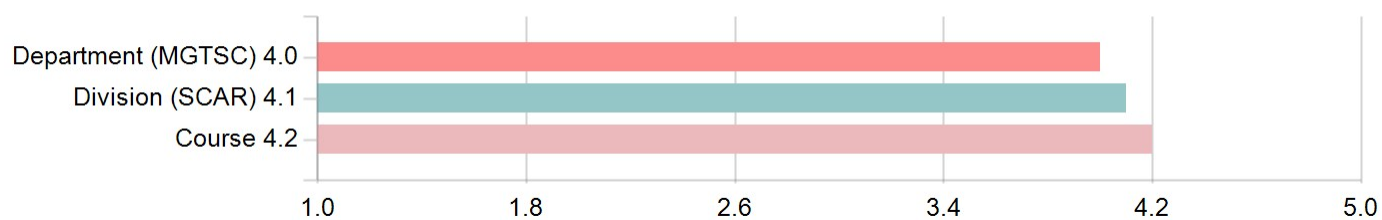

For example, if a department offered only two courses, one with 1000 students who all answered 3.5 and the other with 10 students who all answered 4.5 (so that the means would be 3.5 and 4.5 respectively), then the departmental mean provided on the course evaluations would be 3.51 since the calculation would be $[(3.5 \times 1000) + (4.5 \times 10)] / 1010 = 3.51$ and not $(3.5 + 4.5) / 2 = 4$.

Part A. Core Institutional Items

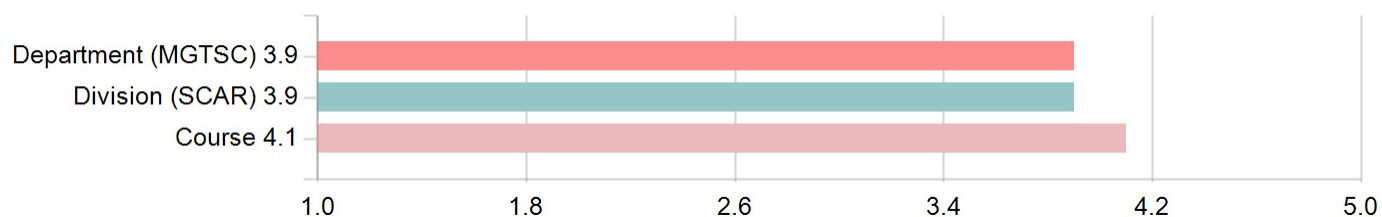

Scale: 1 - Not At All 2 - Somewhat 3 - Moderately 4 - Mostly 5 - A Great Deal

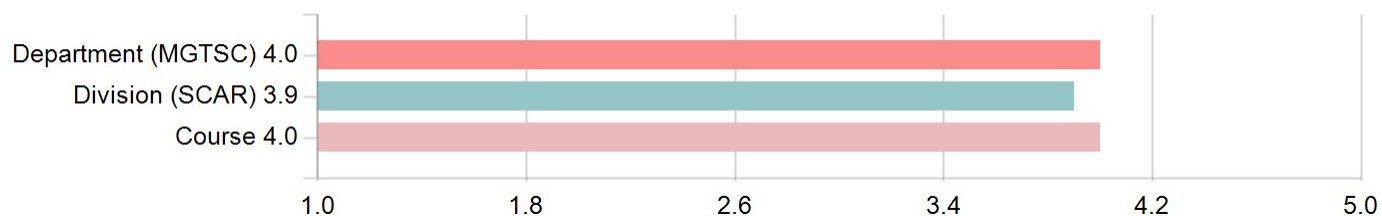

3. The instructor (**Muhebullah Karimzada**) created an atmosphere that was conducive to my learning.

4. Course projects, assignments, tests, and/or exams improved my understanding of the course material.

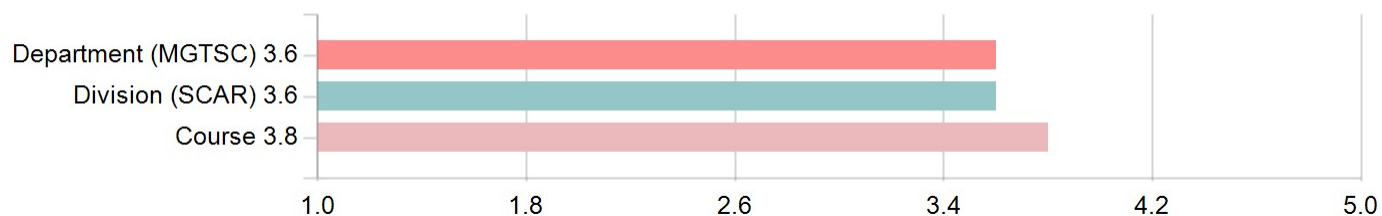

5. Course projects, assignments, tests and/or exams provided opportunity for me to demonstrate an understanding of the course material.

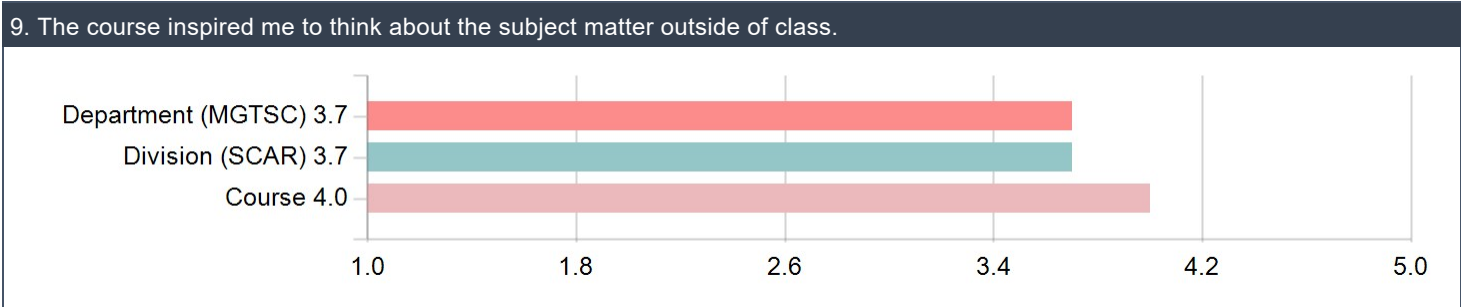

Scale: 1 - Poor 2 - Fair 3 - Good 4 - Very Good 5 - Excellent

6. Overall, the quality of my learning experience in this course was:

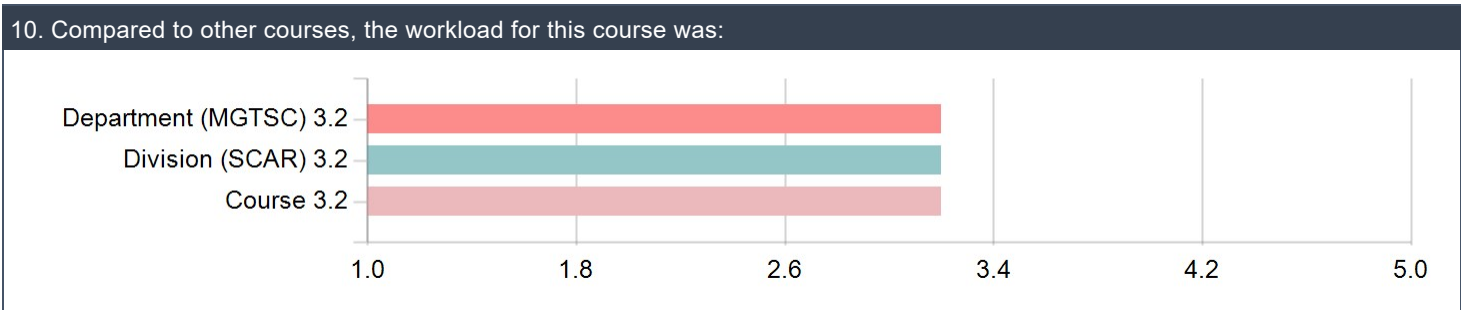

Part B. Divisional Items - UTSC

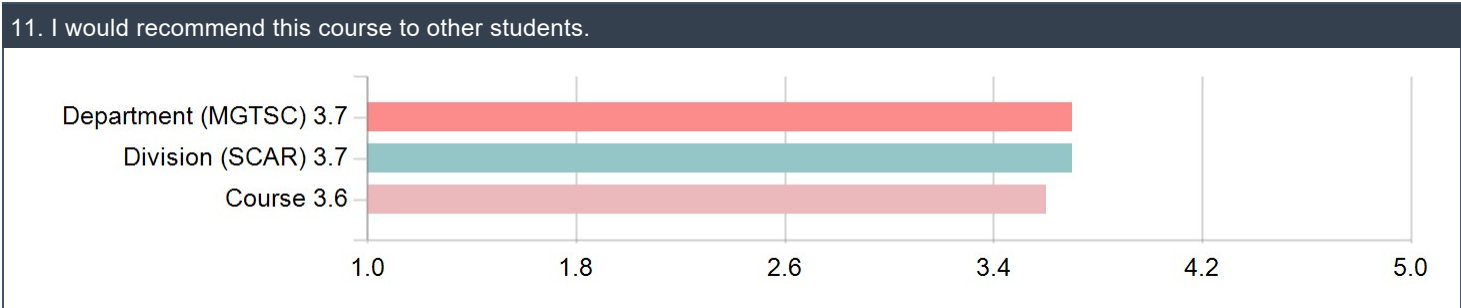

Scale: 1 - Not At All 2 - Somewhat 3 - Moderately 4 - Mostly 5 - A Great Deal

Scale: 1 - Very Light 2 - Light 3 - Average 4 - Heavy 5 - Very Heavy

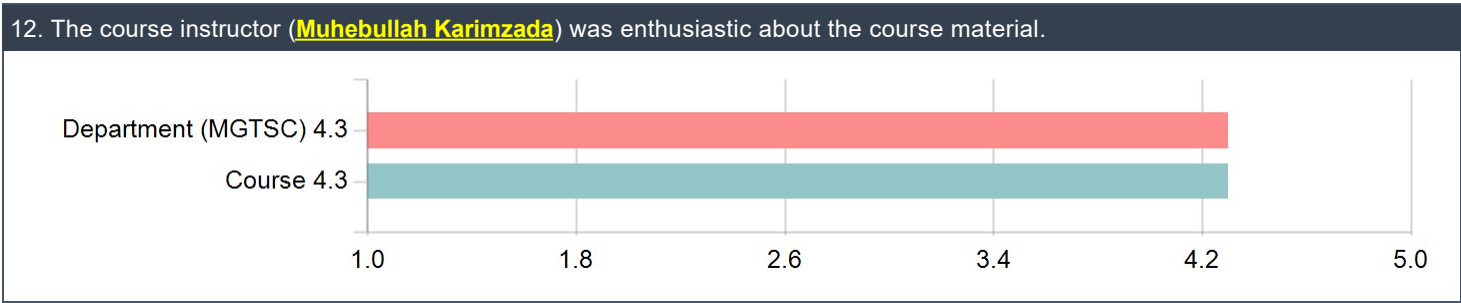

Scale: 1 - Not At All 2 - Somewhat 3 - Moderately 4 - Mostly 5 - Strongly

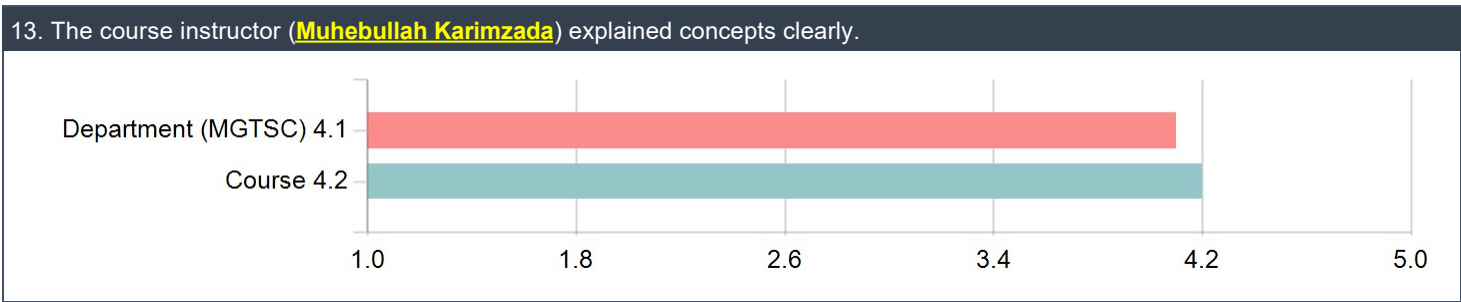

Part C. Departmental Items - Management

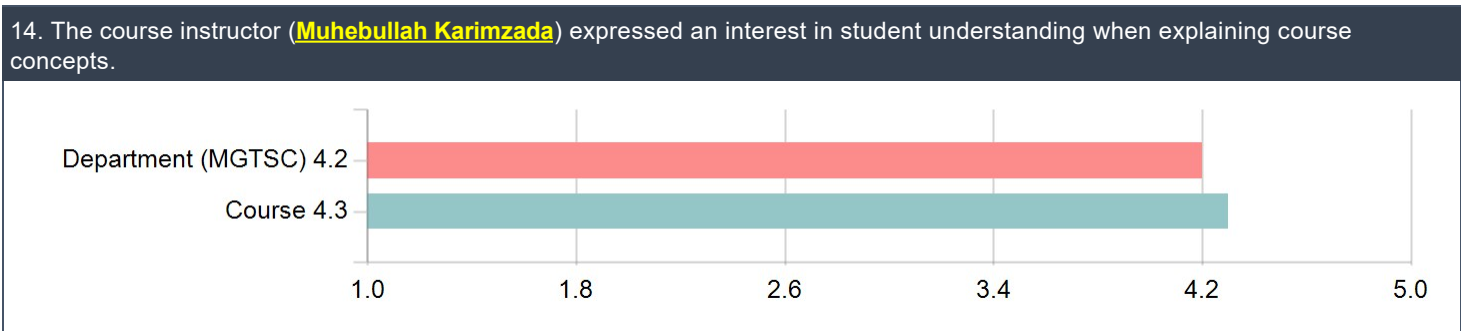

Scale: 1 - Not At All 2 - Somewhat 3 - Moderately 4 - Mostly 5 - A Great Deal

Scale: 1 - Not At All 2 - Somewhat 3 - Moderately 4 - Mostly 5 - A Great Deal

Scale: 1 - Not At All 2 - Somewhat 3 - Moderately 4 - Mostly 5 - A Great Deal

In Class Visit/Video Recording of Class Session

Course Name: Topics in Macroeconomic Theory **Course Code:** MGE06 **Lecture Section:** 01 **Session:** Fall 2023

Instructor: Muhebullah Karimzada **Reviewer:** Laurent Cavenaile **Date of review:** 11/07/2023

Evaluation Values: *N = Evaluation not possible, 0 = Does not meet Expectations, 1– 2 = Areas of Improvement, 3 =Meets Expectations, 4 – 5 = Exceeds Expectations*

Alternatively: *N = Evaluation not possible, X= Does not meet Expectations, AI = Areas of Improvement, ME= Meets Expectations, EE= Exceeds Expectations*

<i>Dimension</i>	<i>Use these explanations of dimensions while rating in class visits</i>	<i>Rating</i>	<i>Evaluator comments to clarify rating or suggestions for improvement</i>
Quality of the Content Presented	1. Materials presented must be consistent with the mainstream views of the discipline.	4	Yes, microfoundations of consumption
	2. Covers relevant theories, concepts, principles, strategies, frameworks in the topic and integrates them for the students	4	During the class I attended, I believe that a reminder of the broader picture regarding microfoundations in Macro would have been relevant.
	3. Incorporates examples of material discussed above in the form of research evidence, or current standards, or cases, or practical applications	3	
	4. Where competing theories are presented, the instructor should clearly indicate where one theory stops and the other begins and highlights ways in which the theories complement each other.	N	
	5. Amount, type of material, and teaching methods used are appropriate to the level of course in that they challenge, stimulate & develop critical thinking	4	Class focused on a single model of consumption-saving decision. Definitely appropriate and introduces students to modern macroeconomic modeling by looking at microfoundations of consumption.

Class Organization	1. Introduction to session clearly communicates goals of current class session & connects material covered in current session to the previous session or the rest of the course 2. Presents material in an organized, well planned manner with topics flowing in a natural order that provides students with a logical structure for the materials presented 3. Amount of material covered is appropriate to length of session and is focused and allows students to be able to determine how topics/subtopics interrelate and to assess which topics are more or less important for the course. 4. Summarizes learning points of the session before ending session	4 4 3 2	Starts with a summary of previous week's material and with setting up the objectives of the current class. The amount of material is appropriate, maybe on the slower side in my opinion. A summary of what we have learnt and how it fits into the broader objective of the class would have been helpful.
Delivery/Style and Classroom dynamics	1. Instructor communicates the materials with enthusiasm that stimulates and peak students' interest. 2. Materials should be presented at a speed that can be absorbed by the typical students in the course. 3. Students should be able to hear and understand what the instructor is saying. 4. Instructor is able to engage student interest by using multiple teaching techniques (blackboards, lecture slides, class discussions, role plays, case studies, demonstrations) appropriate for the content and level of difficulty of the course. 5. Instructor was able to assess student understanding of material presented in the session via discussion questions, quizzes or other activities 6. Appropriate explanations are well-chosen and the type of material presented (e.g., provides examples, & counter-examples for concepts; uses graphics to illustrate theories, frameworks & processes) that allowed students to grasps the concepts and principles.	3 3 4 3 4 4	More interaction with students could be attainable, maybe asking more questions. Speed is relatively slow and easy to follow for students I was sitting at the back of the classroom and had no problem hearing the instructor. The class I attended seemed to be an outlier by only using the blackboard (which I think is not an issue anyway). The typical class involves a combination of slides and blackboard The lecture is followed by a one-hour session during which students can practice on problem sets and ask question to the instructor
Overall Assessment	Considering everything observed during the class visit, how would you rate the instructor's performance	4	

Future Development Plans	Overall, I think that the class is well-structured, covers relevant questions and methods for current macroeconomic courses. The class also introduced students to some ingredients of formal/mathematical macroeconomic modeling that brings them closer to the current state of the literature. Minor points that could potentially be improved relate to stimulating student participation during class (evening classes are typically harder on that dimension and the one-hour session at the end is very useful) and to have more frequent reminders of the broader picture in terms of what we are trying to understand and why the new features being discussed are relevant (for instance microfoundations in this case).

Comments from the Sessional Instructor: Thanks for the comments and suggestions. They are very helpful.

Review of Course Documents

Course Name: Topics in Macroeconomic Theory **Course Code:** MGEEO6 **Lecture Section:** Lec 01 **Session:** Fall 2023

Instructor Muhebullah Karimzada **Reviewer:** Laurent Cavenaile **Date of review:** 11/14/2023

Evaluation Values: *N = Evaluation not possible, 0 = Does not meet Expectations, 1– 2 = Areas of Improvement, 3 =Meets Expectations, 4 – 5 = Exceeds Expectations*

Alternatively: *N = Evaluation not possible, X= Does not meet Expectations, AI = Areas of Improvement, ME= Meets Expectations, EE= Exceeds Expectations*

Description of Evaluation Item	Rating	Evaluator comments to clarify rating or suggestions for improvement
Course Outline & Syllabus:		
1. Course syllabus and outline covers sufficient number of topics in the subject area that are important at the level taught.	4	- The course covers theories of business cycle fluctuation, microfoundations for macroeconomic models and recent advances in these areas.
2. Course text and/or required readings are by researchers/professionals appropriate to the subject area and are at an appropriate level of difficulty for the level of course	4	- Uses Mankiw, Scarth and Lam textbook and additional notes. This is a standard textbook for undergraduate level macroeconomics.
3. Clear description of all the required elements of assessment, including a breakdown of the due dates of various deliverables.	4	- Clear breakdown of grade between midterms, final exam and assignments
4. Specifies a reasonable number of office hours	3	- 90-minute weekly office hours is appropriate
5. Uses the Management Departmental Template that specifies pre-requisites, academic integrity policy etc.	4	- Uses the right template
Assignments		
1. Requirements are clearly stated	4	- One written assignment that asks groups of students to summarize a published article in macroeconomics
2. Free of material errors	4	- Introduction to business cycle fluctuations with an overview of the most recent models
3. On topics that are up to date and relevant examples of current practice and trends.	4	- The textbook is at the appropriate level for a C-level macroeconomics class. The assignment encourages critical thinking by linking papers from the literature to topics discussed in class.
4. Challenge students at the appropriate level, accurate reflection of topics covered in syllabus, and should encourage critical thinking.	4	

Overall Assessment Considering everything in the material dossier, how would you rate the materials overall?	4	Overall, the topic of the course is highly relevant – business cycle fluctuations and policies. It introduces students to macroeconomic modelling. Evaluation methods are appropriate, and the written assignment requires critical thinking and applying/comparing knowledge acquired in class to academic articles.
Future Development Plans Suggestions for improvements and/or any future development plans.	Given the development of AI technologies and ChatGPT in particular, I believe that the written assignment requirements might benefit from small changes. For instance, more focus on the comparison of the academic article and the material covered in class (as opposed to outright summary of the paper) would prevent extensive use of AI technologies to complete the assignment.

Compared to other courses you have taken, how would you rate the workload for this course?

Statistics	Value
Mean	2.05
Median	2.00
Mode	2
Standard Deviation	0.51

The primary reason I took this course was:

Please comment on the overall quality of the instruction in this course:

Comments
All subject matter was clearly explained and made clear. The relatedness of each part of the course to the other parts was also explored and explained, enhancing my understanding of the material.
Instruction was good, wish it was a little easier to communicate with the prof
N/A
pretty good!
Muhebullah was a very eager and enthusiastic professor. He really tried to make the students learn and engage them. The textbook was a little bland and a chore to get through. MyLab quizzes and the tests/exam questions were very good and encouraged learning and thinking about the material.
Professor always ensured and made it a point to make students ask questions if they didn't understand it and he was always very thorough in his lessons as well as practice problems we did together. I could not have asked for a better macroeconomics professor.
.
The instruction was clear and concise. I appreciated the connections made between real-world examples and the material we covered in class. It made the content more interesting and applicable. Sometimes the pacing was a bit slow and lecture flow was not as smooth, but overall quality was good.
good
good
It was good
It is a little difficult
The instructions of the course were clear and easy to follow. The lessons and assessments were helpful and good practice for learning the content.
good
Good
Very good course. Well designed course. I have noticed sometimes that the questions in quizzes and tests do not directly align with the material taught in lectures. Instead they require students to go out and do self-study.
good
Very good
The overall quality of the instruction is good, however, I wish there could be more practice questions for each lecture.
I think the instruction is very helpful and just decreases a lot of the anxiety that comes with learning in university
High quality, very human course, easy to learn and a good experience for me to begin economics. Give me the confidence to continue learning intermediate economics.
good quality
I love business related courses so I was super happy to take macroeconomics. Professor Karimzada is very knowledgeable and he comes to class prepared with his slides. He covers topics in different ways so that it is easy for us to understand. He listens to the students and constantly asks for feedback on the quizzes and the midterms. He also gives us many opportunities to do practice questions so we can apply the content as soon as we learn it.
Everything was clear and the professor gave instructions on everything. All of the instructions to certain tasks were posted online as well.

Please comment on the overall quality of your learning experience in this course:

Comments
Learning experience was good but can be improved. First midterm test, practice questions were provided but for the second midterm there were none. We were not able to gauge what kind of questions for written would be on the test. As well for exam review questions, more questions in both quantity and diversity should have been added to help students practice. If there were more practice then it would have been helpful. As well most slides were just content with minimal examples on sample questions for test. This should be added as well
My quality of learning was very similar to the quality of instruction.
I wish a hardcopy of the textbook was available, I much prefer physical textbooks
I learned mostly on my own due to other commitments and the lack of practice material was detrimental to learning and practicing for tests and exams on my own.
not much to comment on, very good
Overall found it a little boring and not quit for me. I guess I'll stick to the sciences. I generally understood the material and did well in the course. Learning the material and only getting caught up in a few tangling topics.
Definitely one of my best experiences with McMaster so far when it comes to the course and the professor. The TA wasn't very helpful to me not because he didn't try and wasn't helping but because I did not seek him out enough to nobodies fault but my own.
.
I think the lectures were the biggest contributor to my learning, the slides were concise and easy to follow. The weekly quizzes were a great way to check that I was on-track with my learning and focused on understanding trickier concepts. The required textbook readings were rather dense but helpful to recap and extend the material covered in class.
good
good
It was good
Good
The experience with the professor went well, he was able to explain and teach with ease. The course content went by quickly and felt overwhelming, however the learning experience was fine.
good
Good, professor is nice
Very enjoyable course. 10/10. Would recommend. The professor is very passionate and caring.
good
Good
The thing that exhausted me is the time limit of the homework quiz, the time limit is too short some times.
i think my learning experience albeit not completed has been pleasant thus far
The quality of the course was high, the content of the lectures was consistent with the content of the exam, and no discomfort was caused.
i learned well.
I liked taking macroeconomics in the summer because there was only one course I had to focus on. I liked the class content and the fact that we had class two times a week. However, the classes were three hours long and it was difficult to stay focused for that much time. In addition, longer class times meant that more content was covered, so it was difficult to grasp so many chapters all at once. For example, we did chapter 6,7, and 8 all in one week and this is something that would be covered in 3 weeks during a regular semester. However, this is not a fault within the course, the summer term is just too short in general.
I learned a lot more than I thought I would have, and the content was made very clear due to the way it was presented by the professor.
